Product Selection

Iso Busbar Adapters

- Two-part construction
 - Device Adapter Plate (DAP)(carrying the starter) snaps onto the base adapter
 - Base adapter remains on busbar when exchanging starters, providing isolation from live parts
- Test position with load circuit isolated
- Optional control plug makes the starter fully pluggable
- Adapters with assigned current ratings supply the load current to the starter/load feeder by means of wire connections
- Multiple adapters can be combined to bigger platforms by use of the connection clips
- Fits on 5 mm (0.19 in.) or 10 mm (0.39 in.) thick busbars
- Meets UL 508A feeder circuit spacing requirements
